Calumet – Settling tank and Grit Removal

Owner
Metropolitan Water Reclamation District of Greater Chicago

Client
F.H. Paschen, SN Nielsen/IHC Construction, Joint Venture

Location
Chicago, IL

Architect
Metcalf & Eddy

IMI contract amount
\$15,925,000

Completion
In progress

The project consists of the design, engineering, and construction of piping services required to support a new Grit Removal and Primary Settlement tank facility at the Calumet Waste Water Reclamation Facility. The facility is designed to treat 600MGD of waste water, as supplied by two 96" force mains. There will be twelve primary settling tanks and eight aerated grit chambers with associated appurtenant facilities.
